

# Cooling Solutions for Food Processing Applications

## EIC Solutions – The Leader in Thermoelectric Cooling Technology for Electronic Enclosures

Whether protecting raw ingredient processing controls, or automated packaging drives, **our products keep your equipment running by controlling the temperature of critical electronics which:**

- Eliminates heat-related failures and shutdowns;
- Extends the life of critical electronics; and
- Reduces costly downtime.

For existing enclosures, EIC will:

- Calculate cooling requirements;
- Recommend the right air conditioner; and
- Configure mounting for easy implementation.

For new installations, EIC will:

- Help you select the perfect solution from our many standard enclosures and air conditioners;
- Design a custom enclosure engineered for your application; and
- Size the proper air conditioner to maintain your electronics at the right temperature.

Protector™  
Air Conditioned Enclosures

## Key Features of EIC Products Include:

- **Wash-Down Rating:** All of our thermoelectric coolers are rated NEMA 4X and can withstand regular wash-down.
- **No Maintenance:** No filter to clean, drain, or change, and no refrigerant to recharge. The only moving parts are the fans.
- **Temperature Control and Stability:** Effective cooling below ambient temperatures with options for precise temperature control to within  $\pm 0.5^{\circ}\text{C}$ .
- **High Operating Temperatures:** Standard units operate in environments as hot as  $140^{\circ}\text{F}/60^{\circ}\text{C}$  with custom models available up to  $170^{\circ}\text{F}/77^{\circ}\text{C}$ .
- **Multiple Power Options:** Offered in a wide range of AC and DC input voltages with the ability to operate on “dirty power”. Perfect for environments that operate using mobile generators.
- **Reliable:** Typical MTBF of 150,000 hours.
- **Environmentally Friendly:** Uses no CFCs, HCFC, other chemicals or oil.
- **Flexible and Portable:** Standard units can operate in motion and are portable. Products can also be mounted in multiple orientations.
- **Domestic Manufacturing:** Made in the USA.

## Meeting the Cooling Needs of the Food and Beverage Industry

We meet the needs of food and beverage processing and packaging companies by providing secure housings that are environmentally controlled using thermoelectric air conditioning. Our thermoelectric air coolers are designed to be subjected to extreme conditions such as high-pressure wash-downs. Requiring virtually no maintenance, they can be installed in many locations where failure is not an option.

From hot, humid food production environments to equally harsh meat processing and packing plants, thermoelectric cooling technology from EIC Solutions protects the sensitive controls that keep your equipment running.

EIC's products can be found in many food processing facilities with applications including:

- Agitators, Blenders and Mixers
- Evaporators and Dryers
- Pulpers and Finishers
- Splitters, Rollers and Presses
- Controls, PLCs and Touch Screens
- Macerators and Injectors
- Network and Communications Gear
- Security Cameras and Systems

### A Wide Range of Configurations

Since 1988, our patented, solid-state, thermoelectric air conditioning technology has protected sensitive electronics from heat, dust, moisture, corrosion, and the elements. We offer more standard and custom configurations than any other manufacturer including NEMA rated, MIL Spec, and CE certified units. EIC's products have integral power supplies, adjustable temperature control, no maintenance, and exceptionally long life cycles.

With rugged stainless steel construction, reliable performance and flexibility these advanced thermoelectric systems offer reduced equipment size, weight, and power with improved cooling, corrosion resistance and hazardous location protection.

The compact size, weight, and ease of installation of our thermoelectric air conditioners allow them to fit a wide range of existing enclosures. EIC can also provide a complete air conditioned enclosure or case package. We have a large catalog of standard enclosure and case configurations as well as the capability to build custom designs to meet the needs of your specific project.

Whether the application requires an off-the-shelf or custom system, EIC's engineers will help find the solution to best meet your electronics protection requirements.
